

# SSYRA and The Sunshine State Standards Grades 3-5

The Sunshine State Young Reader's Award Program (SSYRA) and the Sunshine State Standards are great partners! As you correlate the standards with SSYRA and your library media program, you offer students the opportunity to become discriminating readers by introducing them to new and noteworthy United States authors. Correlating the standards to your reading motivation program also provides opportunities for making connections to your school's curriculum.

The standards and benchmarks listed below support the program goals by encouraging students to read for pleasure and by recognizing outstanding United States literature.
